

A-LIL-THIN

PRODUCT INFORMATION

A-LIL-THIN is fast acting phosphate-free mud thinner. This concentrated liquid polymer works quickly to breakup mud rings and clay deposits.

ADVANTAGES

- Fast acting mud thinner
- Can help reduce costs
- Non-fermenting
- Quickly penetrates, reduces and disperses sticky clays
- Works to reduce pulling times and help eliminate problems with stuck pipe.

APPLICATIONS

A-LIL-THIN is best used in small doses. In addition to breaking up mud rings and clay deposits, it can also reduce the gel strength and viscosity of the drilling fluid.

TYPICAL USE

Typical amounts of A-LIL-THIN added to a fluid system	
Drilling Application/Desired Results	lb/300 gal
Bit balling or mud rings	1/2 quart - 1 gal
Mud thinner	Use as needed
A-LIL-THIN can be added through the hopper or at the connection, but should be added in small doses in the beginning and then increased as needed.	

TYPICAL PROPERTIES

Specific gravity	1.2 - 1.5
pH (as supplied)	6.5 - 7.5
Physical appearance	Liquid, yellow

PACKAGING A-LIL-THIN is packaged in 5 gallon buckets
