

SUPER POLY LIQ

PRODUCT INFORMATION

SUPER POLY LIQ is an anionic liquid polymer with a high molecular weight. It is designed to encapsulate cuttings and stabilize shale while improving wellbore stability.

ADVANTAGES

- Adds viscosity
- Reduces friction
- Acts as a flocculent
- Works in fresh and saltwater systems
- Improves shale stability
- Encapsulates cuttings

APPLICATIONS

SUPER POLY LIQ can be used in fresh and saltwater to help with wellbore stability. The addition of SUPER POLY LIQ will increase the viscosity and enhance the over all capabilities of the drilling fluid.

TYPICAL USE

Typical amounts of SUPER POLY LIQ added to a fluid system	
Drilling Application/Desired Results	qt/100 gal
Standard concentrations	1.75 - 6.5
Reduce torque and increase hole stability	1.5

TYPICAL PROPERTIES

Specific gravity	1.07 - 1.10
pH (as supplied)	8.0 - 9.0 (1% solution)
Physical appearance	Liquid, cream colored

PACKAGING SUPER POL LIQ is packaged in 5 gallon buckets
